

CUSTOM AMENITY DISPENSERS

Jenggala has qualified and maintains the strict ISO Quality Assurance System as well as certification of Standard National Indonesia for Food Safe and Chip Resistant quality ceramic tableware.

A point of beauty, that's a solution to reduce single use plastic

The amenity dispenser, with its capability to be refilled, is becoming an essential component of hotels and resorts worldwide.

The traveler is becoming more and more conscious of the effects of carbon emissions and accumulating waste on our natural environment and significant changes to the planet, it is critical that the hospitality sector become proactive to address these concerns.

Hotels and resorts have always been setting a good example of how to reduce waste, reduce energy consumption and coming up with innovative ways to make positive changes, way ahead of other industries worldwide.

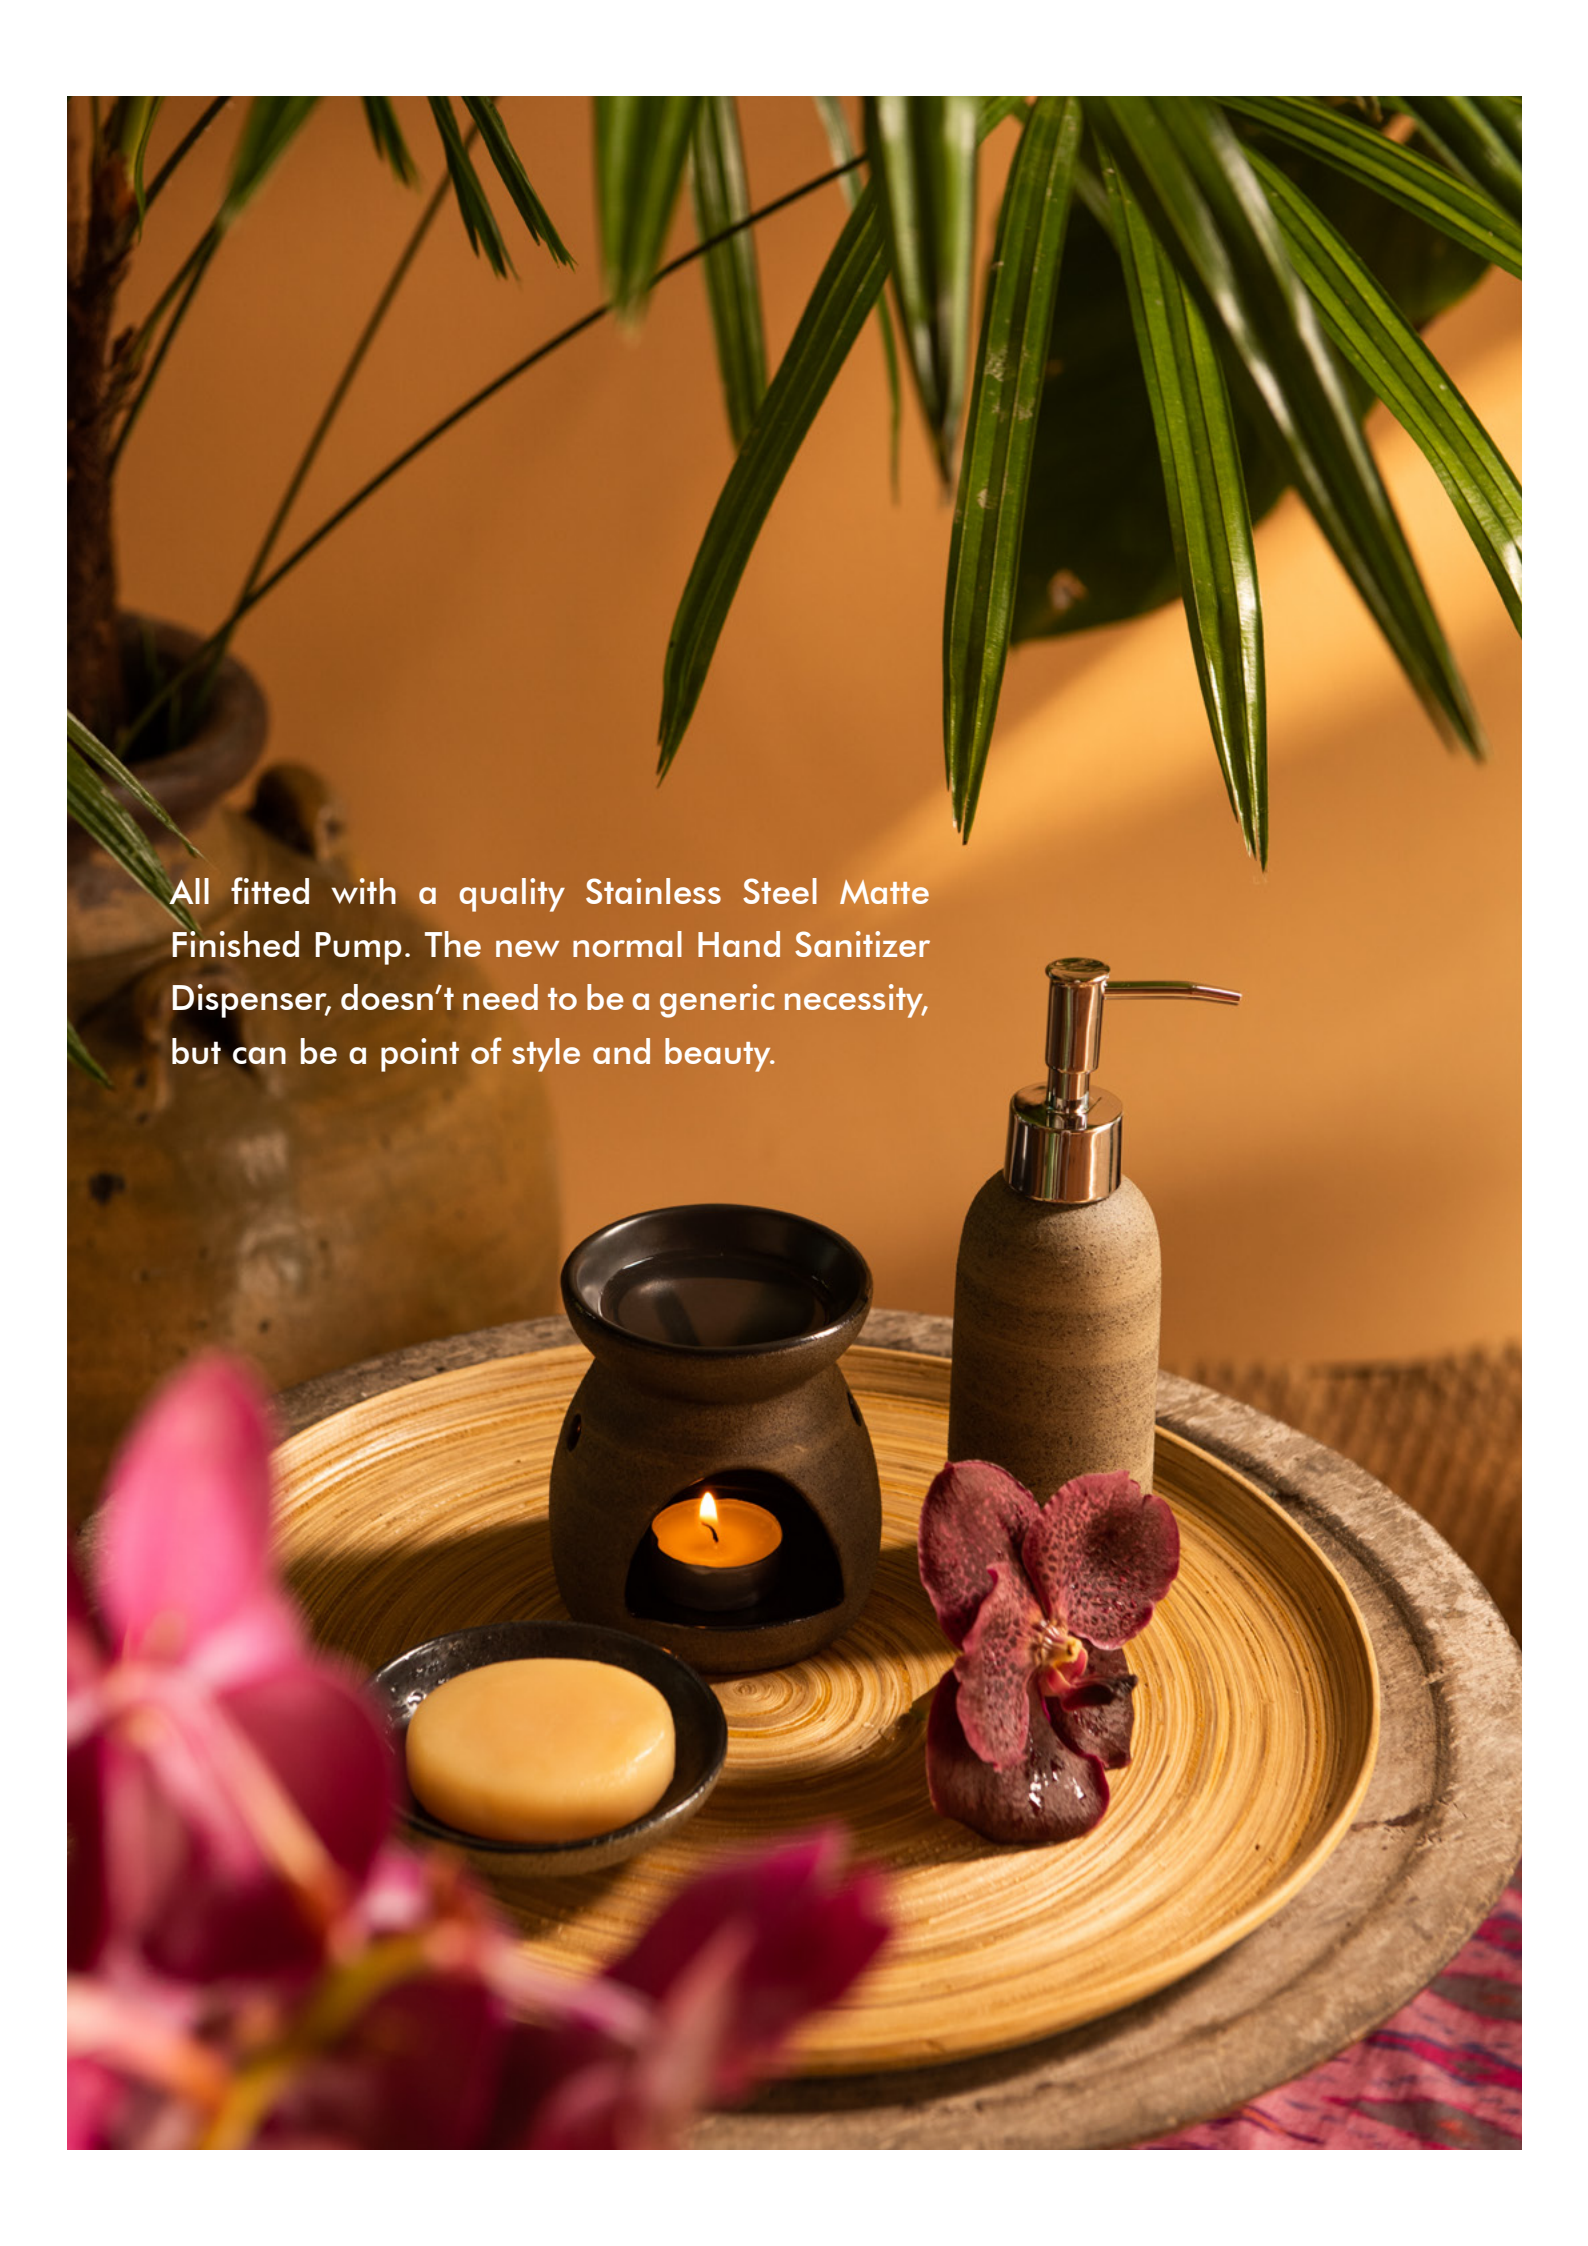

One major critical area for hospitality operations is reducing single use plastic.

Jenggala, with our years of experience producing quality ceramic products, offer many alternatives to single use plastic. Our range of amenity dispensers are available in a wide variety of sizes to fit your requirements, as well as glaze finishes and shapes to customize the fit to your ambiance and color palette.

Jenggala can also incorporate custom logos and labels to make the products exclusive.

A hand sanitizer dispenser with a matte, textured body and a stainless steel pump is the central focus. It sits on a round, light-colored wooden tray. To its left is a dark, ceramic-style candle warmer with a lit candle inside. In front of the warmer is a small dish containing a round, yellow bar of soap. To the right of the dispenser is a single, dark purple orchid flower. The entire scene is set against a warm, orange-toned background, with long, green, feathery leaves of a plant hanging down from the top. In the bottom left corner, there are blurred pink and purple flowers. The lighting is soft and warm, creating a relaxing, spa-like atmosphere.

All fitted with a quality Stainless Steel Matte Finished Pump. The new normal Hand Sanitizer Dispenser, doesn't need to be a generic necessity, but can be a point of style and beauty.
