

FOLDED COLLECTION

JENGGALA™

FOLDED COLLECTION

Jenggala's Folded Plate Collection is the ultimate merger of processes from the consistent shape of the mold to the detail from the touch of the hand. Many manufacturers avoid this task, but at Jenggala we embrace the challenge and results of coordinating the blend of two shaping processes. The final product has a unique effect that freezes movement and has a detail that you want to hold in your hand. Like ocean waves this collection has a familiar form but with subtle alterations from nature.
